WEDE5020 – WEBSITE PROJECT PROPOSAL

Proposal 2: Sparkle Clean Services

1. Organisation Overview

Organisation Name: Sparkle Clean Services

Brief History

Sparkle Clean Services was founded by Gloria Motau, who comes from Almasdrift C, a small village in Mpumalanga. She started the business with the aim of providing reliable and affordable cleaning services to homes and businesses. Through commitment and hard work, the business continues to grow.

Mission Statement

To provide reliable, affordable and high-quality cleaning services while ensuring customer satisfaction.

Vision Statement

To become a trusted cleaning company known for professional services, reliability and customer satisfaction.

Target Audience

The target audience includes homeowners, tenants, offices, small businesses and property owners who require reliable cleaning services.

2. Website Goals and Objectives

The main purpose of the website is to establish a professional online presence for Sparkle Clean Services. It will make information about the business and its services easily accessible to potential customers.

The website will:

- Promote the company's cleaning services.
- Provide information about available services and prices.
- Allow customers to submit enquiries.
- Provide contact information and business locations.
- Attract new customers.
- Improve the company's online visibility.

Key Performance Indicators (KPIs)

Website success will be measured through:

- Number of website visitors.
 - Number of service enquiries.
 - Number of completed enquiry forms.
 - Number of visitors viewing the services page.
 - Number of new customer requests.
-

3. Current Website Analysis

Sparkle Clean Services does not currently have a dedicated professional website. Customers may therefore have difficulty finding complete information about the company's services and contacting the business online.

The proposed website will solve this problem by providing information about the company, services, contact details and an enquiry form in one central location.

4. Proposed Website Features and Functionality

The website will contain the following main pages:

Home: Introduces the company, its services and includes a clear call-to-action.

About Us: Provides the company's history, mission and vision.

Services: Displays the different cleaning services offered, together with descriptions and pricing information.

Enquiry: Allows customers to submit their details and request information about cleaning services.

Contact: Provides contact details, business locations and a map.

Gallery: Displays images showing cleaning services and completed work.

5. Design and User Experience

The website will have a clean, simple and professional appearance that reflects the nature of the cleaning business.

Colour Scheme:

Blue, white, light grey and green will be used to create a fresh and trustworthy appearance.

Typography:

A clear and readable font such as Aptos will be used throughout the website.

Layout:

The website will have a consistent navigation menu, organised sections, clear headings, relevant images and visible call-to-action buttons.

User Experience:

The website will be designed to be easy to navigate and accessible on smartphones, tablets and computers. Readable text, suitable colour contrast and alternative text for images will also be considered.

6. Technical Requirements

The website will be developed using:

- **HTML5** for the structure.
- **CSS3** for styling and layout.
- **JavaScript** for interactive features.
- **Visual Studio Code** for development.
- **Git** for version control.
- **GitHub** for storing and managing the project.

A domain name and hosting service will be required if the website is published online.

7. Timeline and Milestones

Stage	Activity
Week 1	Research and project planning
Week 2	Proposal, sitemap and wireframe
Week 3	Develop basic HTML pages
Week 4	Test pages and update GitHub

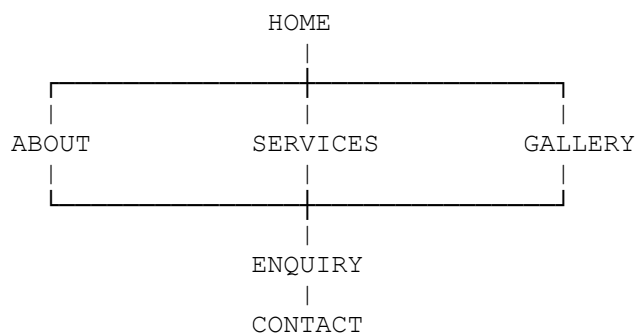

8. Budget

The estimated budget for the website is **R33,000**.

Item	Estimated Cost
Planning and research	R4,000
Website design and development	R12,000

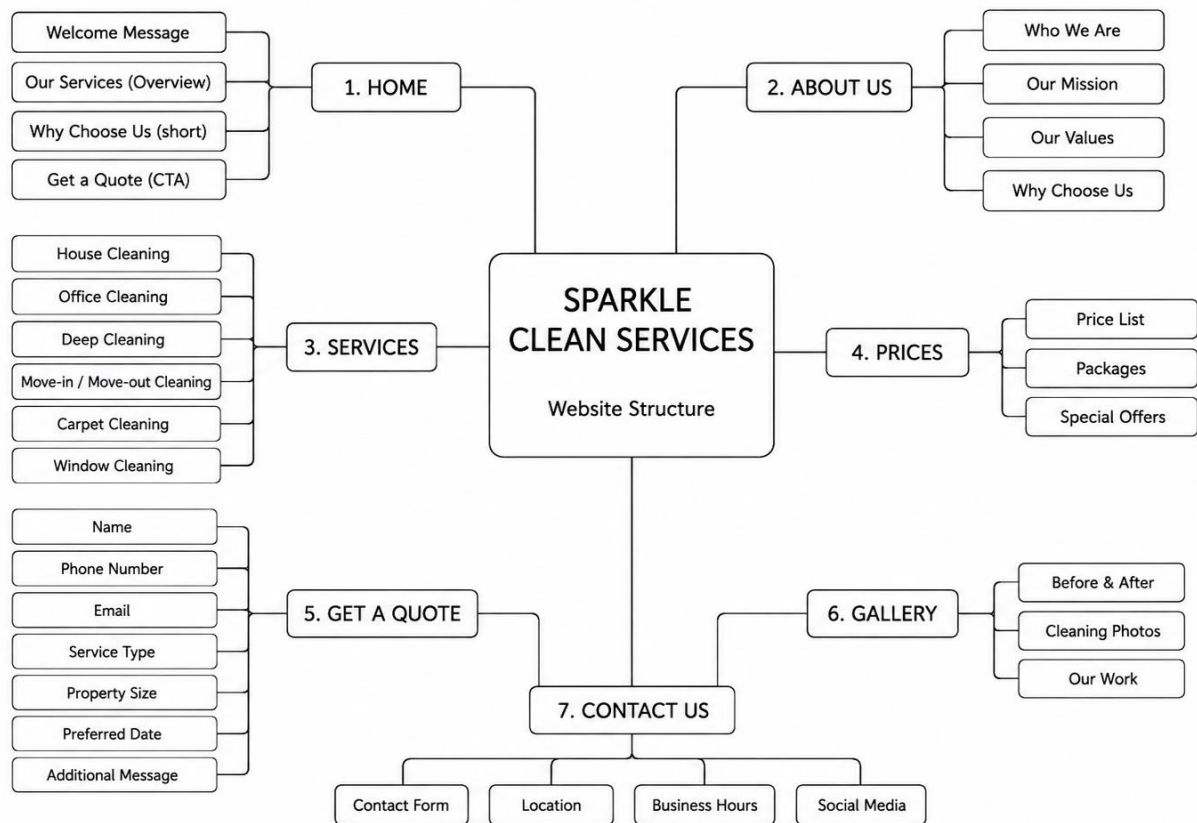

Images and content	R4000
Domain and hosting	R3 000
Testing and optimisation	R3 000
Maintenance and updates	R4 000
Contingency	R3 000
Total	R 33 000

9. Sitemap

The sitemap shows the relationship between the main pages and provides a clear structure for website navigation.

10. Low-Fidelity Wireframe

11. Conclusion

Sparkle Clean Services will benefit from a professional website by improving its online presence, promoting its cleaning services and making it easier for customers to submit enquiries. The proposed website will be simple, professional, responsive and user-friendly.
