WEDE5020 – WEBSITE PROJECT PROPOSAL

Proposal: Thuli's Hair Studio

1. Organisation Overview

Organisation Name: Thuli's Hair Studio

Brief History:

Thuli's Hair Studio was founded by a 23-year-old woman who started the business while she was in Grade 11. What started as a passion for hairstyling grew into a business as more customers became interested in her services. The salon focuses on providing quality and affordable hairstyles.

Mission:

To provide customers with affordable, quality and professional hairstyling services while making them feel confident and comfortable.

Vision:

To become a trusted and well-known hair studio that is recognised for quality hairstyles, affordable prices and good customer service.

Target Audience:

The target audience includes teenagers, young adults and other people who are interested in braiding and modern hairstyles.

2. Website Goals and Objectives

The main goal of the website is to give Thuli's Hair Studio a professional online presence and make it easier for customers to find information about the salon.

The website will:

- Display available hairstyles and prices.
- Show pictures of previous hairstyles.
- Provide information about the salon.
- Allow customers to make enquiries.
- Provide contact details and locations.
- Help attract new customers.
- Make the salon's services available online.

Key Performance Indicators (KPIs)

The success of the website can be measured through:

- Number of website visitors.
- Number of customer enquiries.
- Number of contact form submissions.
- Number of people viewing the services page.
- Number of customers accessing the website from mobile devices.
- Increase in new customer enquiries.

3. Current Website Analysis

Thuli's Hair Studio does not currently have a dedicated professional website. Customers may have to rely on social media or direct communication to find information about the salon.

The proposed website will improve this by providing all important information in one place. Customers will be able to view hairstyles, prices, pictures, contact information and make enquiries easily.

4. Proposed Website Features

The website will have at least five main pages:

Home Page

The homepage will introduce Thuli's Hair Studio and include attractive images, a short introduction and a call-to-action button.

About Us

This page will provide information about the salon, its history, mission and vision.

Services

This page will show the different hairstyles offered and their prices.

Enquiry

Customers will be able to complete a form to ask about hairstyles, prices and appointments.

Contact

This page will include the salon's contact details, locations and a map.

A **gallery** can also be included to show examples of hairstyles.

5. Design and User Experience

The website will have a modern, attractive and feminine design that represents the beauty and hair industry.

Colour Scheme:

- Pink
- Black
- White
- Light neutral colours

The colours will make the website look attractive while keeping the text easy to read.

Font:

A simple and modern font such as Aptos will be used to keep the website professional and readable.

Layout:

The website will have a clear navigation menu at the top, attractive images, organised sections and clear buttons.

The website will also be designed to work properly on **phones, tablets and computers**.

6. Technical Requirements

The website will use:

- **HTML** – to create the structure of the pages.
- **CSS** – to style the website.
- **JavaScript** – to add interactive features in Part 3.
- **Visual Studio Code** – for writing the code.
- **GitHub** – for version control and storing the project.

The website will also require a domain name and hosting if it is published online.

7. Timeline and Milestones

Stage	Activity
Week 1	Research and planning
Week 2	Create proposal, sitemap and wireframe
Week 3	Create HTML pages
Week 4	Test pages and update GitHub

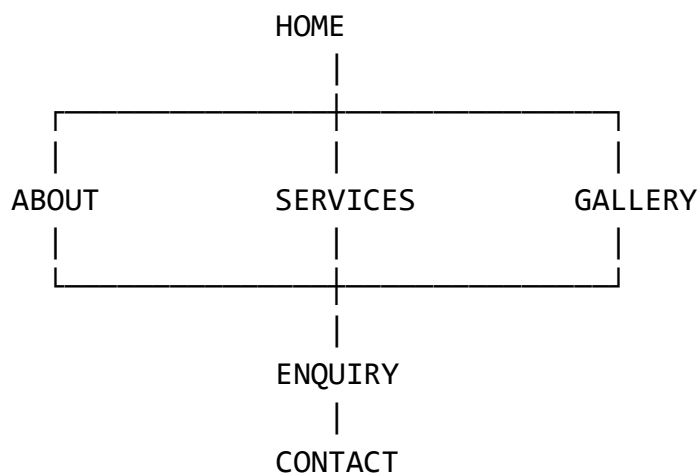

8. Budget

The estimated budget for developing the Thuli's Hair Studio website is **R40,000**.

Item	Estimated Cost
Planning and research	R5,000
Website design and development	R15,000
Images and content	R5,000
Domain and hosting	R3,000
Testing and optimisation	R4,000
Maintenance and updates	R5,000
Contingency	R3,000
Total	R40,000

9. Sitemap

The proposed website structure will be:

10. Low-Fidelity Wireframe

11. Conclusion

Thuli's Hair Studio would benefit from having a professional website because it would make the salon's services and information easier for customers to access. The website would help the business attract new customers, display its hairstyles and prices, and provide an easy way for customers to make enquiries.

The website will focus on being simple, attractive, mobile-friendly and easy to navigate. The proposed budget for the project is R40,000.
